

FOR OUR HANDASSEMBLED,
PLEXIGLAS BINS ONLY!

THANK YOU FOR CHOOSING TRADE FIXTURES!

Hello! I am your new bin. I have come a long way to join you and to make your store to look great! I have been through a factory, a warehouse, on someone's dock, and even on a truck. Here are some things you should do before you put me to work:

Cleaning Instructions For New Bins:

- Peel off the protective cover
- Wash the bins with a mild dishwashing detergent
- DO NOT USE cleaning solutions with Ammonia, Chlorine, abrasives, or Citrus extracts as they will mar the plastic
- Certain spices could stain and/or corrode your bin. This would not be covered under warranty.

Cleaning Instructions for older bins with stubborn stains such as nut oil and coffee oils:

- Wash the bin with a solution of 70% alcohol and 30% water and immediately rinse with water and dry thoroughly.
